

# Donaldson School

***New installation & Maintenance works are carried out on a regular basis.***

Our association with Donaldson's school for the deaf began when the board of governors decided to move the world's leading facility from its legendary home at Wester Coates Edinburgh to a new state of the art facility in Linlithgow.

JBE were appointed by the facility manager and principal to complete works and provide the children with a safe environment which they would feel comfortable in. We have now been actively working within the school in its new state of the art building.

**All our operatives who work at the school are vetted by Disclosure Scotland.**

**Football Pitch Lighting.  
Sensor Garden.  
Swimming Pool.  
Activity Classrooms  
A few of the areas we have carried out Electrical works.**
